GENERAL COMMENTS

Strong domestic demand, particularly from competitive pricing into hog feed rations, is supporting U.S. DDGS prices this week. Lower year-over-year ethanol/DDGS production rates are further working to keep prices firm. FOB ethanol plant DDGS are up \$3/MT this week at \$154/MT while Kansas City soymeal prices are up \$2.75/MT. DDGS are priced at 115 percent of cash corn values, up from last week and above the five-year average ratio of 109 percent. The DDGS/soymeal price ratio is 0.41, down from the prior week and below the three-year average of 0.42.

Brokers report that international destinations are working on covering Q4 and Q1 2021 needs and are checking prices daily. With FOB Gulf soymeal and DDGS prices both moving higher this month, there end-users are reportedly nervous about further price increases, leading to more frequent price checks.

Barge CIF NOLA offers are \$11-16/MT higher this week while FOB Gulf offers are up \$13/MT for spot positions and \$11-12/MT for deferred. U.S. rail rates are \$7-8/MT higher while 40-foot containers to Southeast Asia are up \$5-6/MT, averaging \$258. Offers for containers to Malaysia and Vietnam have posted the largest price increases this week, up \$10-12/MT.

OCEAN FREIGHT MARKET

There was a change in Dry-Bulk freight direction and timing this week. The week started out slow but, in contrast with recent trends, the market rallied at week's end. Improved iron core and coal cargo demand boosted the Capesize market, which in turn lent support to the Panamax sector. Panamax vessel rates were also supported by healthy grain demand from the U.S. Gulf to Asia. As the physical markets showed signs of life, the paper traders jumped back in. October and Q4 Panamax rates traded at \$12,500-\$12,600/day. The U.S. Gulf grain vessel lineup is getting bigger. Two Gulf export facilities have 8 and 16 vessels in port and waiting to load, with more arrivals this week.
