## GENERAL COMMENTS

---

U.S. DDGS prices continue to decline with increased ethanol production and end users having covered near-term needs. Prices for DDGS FOB ethanol plants are sharply lower at \$199/MT this week. The DDGS/cash corn ratio is 0.82 this week, down from the prior week and below the three-year average of 1.13. The DDGS/Kansas City soymeal ratio below the prior week at 0.54 and above the three-year average of 0.46.

On the international market, DDGS values are also lower with buyers assessing the freight market rally and the recent decline in CBOT futures. Barge CIF NOLA offers are down \$30/MT this week while FOB Gulf offers are \$28-30/MT weaker, averaging \$246/MT for July shipment. Prices for 40-foot containers to Southeast Asia are mixed, with offers for product into Myanmar and Thailand \$3-4/MT higher while prices into Malaysia and Vietnam are down \$4/MT. On average, containers to Southeast Asia are priced at \$332/MT this week, down \$3/MT from last week's trade.

## OCEAN FREIGHT MARKET

Paper traders in the Capesize market decided that good times are finally here and made a bold move to push values higher. The paper market's move appears overdone, but physical traders were forced to scramble and cover their shorts to manage risk. Panamax and other sectors followed suit. This was the biggest single week jump of the last three years and has lifted rates to levels not experienced since 2010. Commodity markets appear to be questioning the strength of the economic "Super Cycle", but freight markets want to believe it is in full swing. I, frankly, do not see the fundamental justification for such a big jump in dry-bulk freight values, but the paper traders seem to have control of the helm at the moment.

There is not much new or positive to report in containerized grain export markets. The difficult situation persists, and it is going to be a very bumpy ride for months to come. Buyers simply need to understand this and plan accordingly.
