GENERAL COMMENTS

U.S. DDGS prices are up \$5.00/MT this week as a modest decrease in barge freight is helping pull product from the domestic market to the Gulf. A strong summer export program (USDA reported DDGS exports are up 10 percent YTD) and early-fall reductions in ethanol run rates have helped tighten supplies. Kansas City soymeal prices are down \$10/MT this week as the futures market has trended lower, putting the DDGS/Kansas City soymeal ratio at 0.60, up from last week and above the three year-average of 0.47. The DDGS/cash corn ratio is higher this week at 1.02, up from 0.98 last week but below the three-year average of 1.09.

On the export market, DDGS values are mixed with barge CIF NOLA rates are down \$6/MT for Q4 2021 shipment and down \$2 for Q1 2022. FOB NOLA offers are up \$1-2/MT for November – January shipment while U.S. rail rates are up \$9-10/MT this week.

Brokers continue to report that the international market is seeing fewer offers for containerized DDGS due to high freight costs. Both buyers and sellers are eyeing the huge inverse in the freight market and proceeding somewhat cautiously. Some trade is still getting done, however, and prices for 40-foot containers to Southeast Asia are up \$6/MT at \$354/MT this week.

Please note that FOB Gulf markets will likely be more volatile than normal as the industry works to recover full capacity in New Orleans area export facilities. There are significant questions about elevation capacity and availability and the DDGS market will have to compete with other grains as the U.S. new crop harvest approaches. Consequently, both flat prices and spreads versus other markets may see greater than normal volatility.

DDGS Price Table: October 7, 2021 (USD/MT) (Quantity, availability, payment and delivery terms vary)			
Delivery Point Quality Min. 35% Pro-fat combined	November	December	January
Barge CIF New Orleans	248	248	250

Elwood, IL Rail Yard (delivered ramp)	249	251	252

Source: World Perspectives, Inc. *Prices are based on offer indications only; terms of delivery, payment and quality may vary from one supplier to another, impacting the actual value of the price.

** Note that FOB Gulf and other DDGS markets may be more volatile than normal going forward as the industry works to recover full operations and capacity in the U.S. Gulf region following Hurricane Ida.

OCEAN FREIGHT MARKET

Freight markets are a crazy as the traditional sea shanty sailors have sung for centuries. All sectors continue to follow the Capes, which have now reached 13-year highs. The Capesize market is putting a big squeeze on the short players and the goal is to see how high the market can be pushed. Capesize FFA index rates have already passed \$65,000/day and the market is pushing for more. The all-time high was \$300,000/day back in May of 2008. So, are we headed for 2008 all over again? Or are we in for a big correction once the shorts have been forced out?

October Capesize vessels reached \$65,000 before settling back to \$63,000 at the close. Panamax FFA paper gained support from the Capes and ended the day at \$36,250 for October.

There are now 8 of the 9 previously operating New Orleans export grain facilities back online. There are 68 grain vessels currently in NOLA and FOB vessel export grain values at Mississippi River facilities for October still remain uncertain.
