GENERAL COMMENTS

DDGS prices are \$13/M higher this week and buyers note the tone is “quite a bit firmer”. Ethanol run rates were lower last week, which has helped support values amid a pre-WASDE report rally in corn and soymeal futures. The DDGS/Kansas City soymeal ratio is up from last week at 0.48 and below the three-year average of 0.49. The DDGS/cash corn ratio rose from the prior week to 0.93 and below the three-year average of 1.06.

Barge CIF NOLA DDGS values are up \$4/MT for spot shipment and up \$6-7/MT for October-December positions. FOB NOLA offers have followed the same trend with September offers up \$3 and Q4 positions priced \$7/MT above last week. Brokers indicate international demand is becoming active amid the soymeal rally and crop production worries in Europe. Offers for 40-foot containers to Southeast Asia are up \$5-6/MT at \$383 for Q4 shipment.

OCEAN FREIGHT MARKET

This week was not a story of the little engine that could. Freight markets staged a small rally early in the week but could not keep the momentum going and, once again, fell back. One does have to wonder when a bottom will be found. And, if shipping and the dry-bulk index has any true relationship with global economic health; it is not painting an optimistic picture.

On the bright side, from a shipper's perspective, container markets are showing improved availability of empty containers at U.S. West Coast ports. This is a positive development for export grain sellers. U.S. containerized grain exports more than doubled in this week's FGIS export report.

The ILWU-West Coast Port labor contract negotiations continue as the big issue of port automation remains to be resolved.
